

95390-900 Pushplate

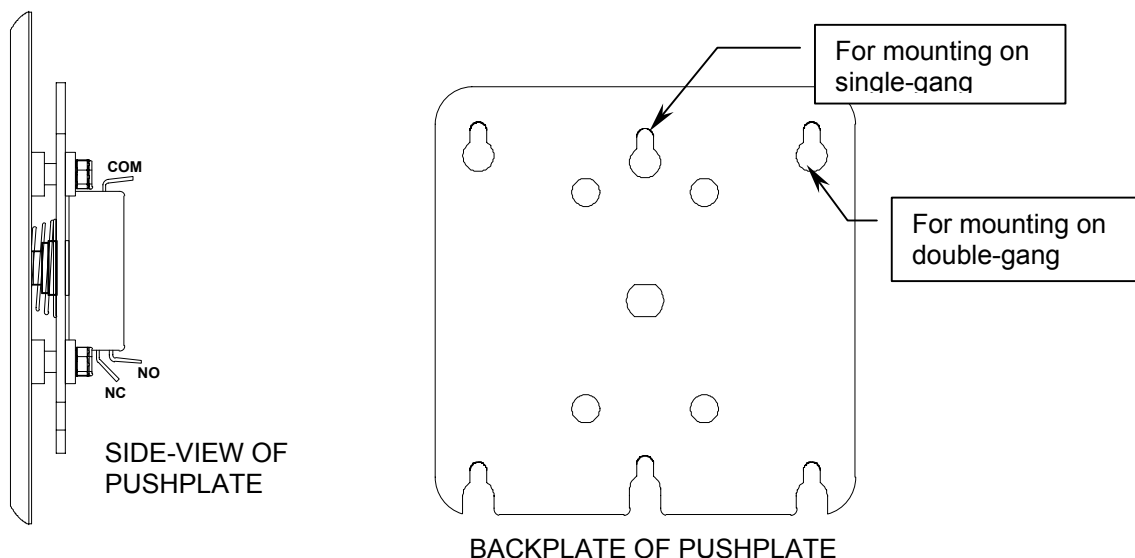

Installation Instructions

GENERAL DESCRIPTION:

The 95390-900 pushplate is designed to fit neatly in a standard electrical gang box or plastic enclosure. The faceplate is made of 1/16" thick 304 stainless steel for durable use. The pushplate may be hard-wired to the door control or connected to a radio-controlled transmitter. The dimensions of the pushplate are 4.75" x 4.75" x 0.62" deep.

INSTALLATION:

1. Wire the pushplate to the door control or radio controlled transmitter using the NO contact and common.
2. Finger-tighten the enclosed hex-head screws into the electrical enclosure. Note that there are two different sized screws. The larger screws (#8) are for the corner locations on a double-gang electrical type box. The two smaller screws (#6) are for a single-gang electrical type box.
3. Place the pushplate holes over the hex-head screws. Use the enclosed hex key to fully tighten the screws.
